RESEARCH EXPERIENCES

Research for the Regulatory Advancement of Innovative Biologics in Oncology

Researcher

April.2024 – Feb.2026 (Expected)

Funding Ministry of Food and Drug Safety

- Analyzed the impact of data maturity on decision modeling for the economic evaluation of anticancer drugs.
- Compared the predicted long-term outcomes and validated with the national cancer registry database.
- Analyzed correlations between surrogate endpoints and overall survival of biologics in advanced breast, colorectal, and gastric cancer using the national cancer registry database.

Atypical Hemolytic Uremic Syndrome (aHUS) Health Economics Outcome Research

Researcher

Mar.2024 – 2025.03

Funding AstraZeneca

- Conducted a comparative analysis of survival and clinical outcomes in aHUS patients treated with eculizumab versus standard-of-care therapies.
- Analyzed healthcare resource utilization and costs of aHUS patients in Korea using the national claims database.

Enhancing Drug Safety Monitoring Systems

Assistant researcher

2024.03 – 2024.11

Funding Ministry of Food and Drug Safety

- Conducted a comparative analysis of post-marketing surveillance systems from 10 countries for the Ministry of Food and Drug Safety, evaluating international regulatory monitoring practices.

Dr.Seo's Hepatotoxicity Lab Research Internship (Ewha Womans University)

Student researcher

2023.06 – 2023.10

2021.07 – 2022.07

- Actively participated in developing an alcoholic liver cancer mouse model.

RESEARCH INTERESTS

- Cost-Effectiveness Analysis / Decision Model
- Pharmacoeconomics and Pharmaceutical Outcomes Research
- Reducing Health Disparities in Rare Diseases
- Generating and Validating RWE in Healthcare Big Data
